

How to:

1. Trace the line drawing onto watercolor paper.
2. Start with painting the flowers. Mix red and purple/red. Paint in flower petals with a watery mixture. **Make sure to leave white areas.** Add a little bit of dark purple to the mixture and paint in darker areas of petals making sure not to cover the white areas. **TIP*Try to paint this delicately, less is more in this case!**
3. Leaves: Mix green and black. Paint a light wash on leaves. Add more black or a little red to the paint mixture and paint in darker areas. Try blending the darker color into the lighter color green.
4. Boots: Mix lightest green with the medium shade of green and paint the boots. Mix black to the same mixture and paint in the detail lines.
5. Underneath boots: Mix orange, and brown. (possibly a little red) and paint the sole of the boot. Then add black and more brown to the paint mixture and paint in the “mud” on the bottom of boot.
